

8.2 Perimeters of Composite Figures

Essential Question How can you find the perimeter of a composite figure?

1 ACTIVITY: Finding a Pattern

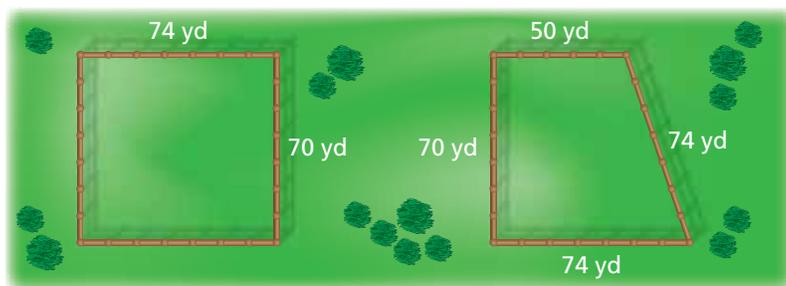

Work with a partner. Describe the pattern of the perimeters. Use your pattern to find the perimeter of the tenth figure in the sequence. (Each small square has a perimeter of 4.)

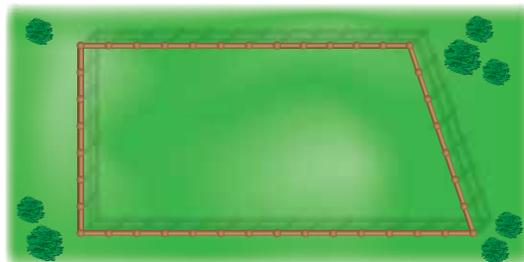

2 ACTIVITY: Combining Figures

Work with a partner.

- a. A rancher is constructing a rectangular corral and a trapezoidal corral, as shown. How much fencing does the rancher need to construct both corrals?

- b. Another rancher is constructing one corral by combining the two corrals above, as shown. Does this rancher need more or less fencing? Explain your reasoning.
- c. How can the rancher in part (b) combine the two corrals to use even less fencing?

Geometry

In this lesson, you will

- find perimeters of composite figures.

3

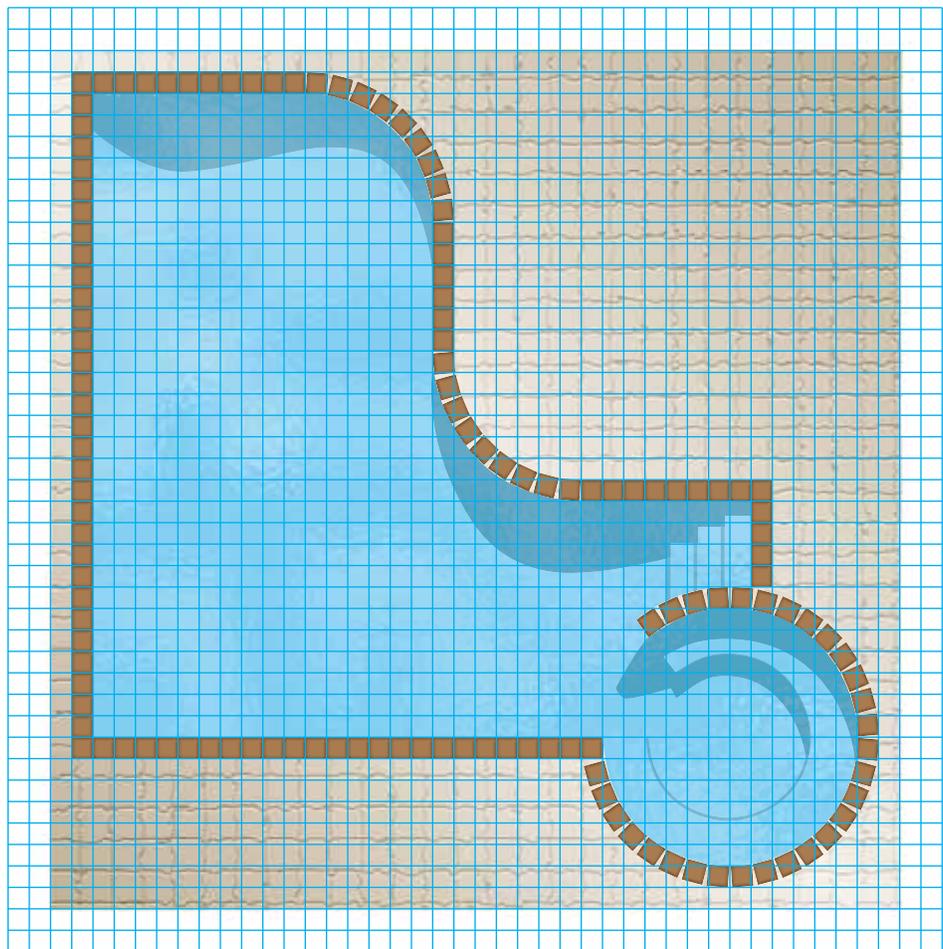

ACTIVITY: Submitting a Bid

Work with a partner. You want to bid on a tiling contract. You will be supplying and installing the brown tile that borders the swimming pool. In the figure, each grid square represents 1 square foot.

- Your cost for the tile is \$4 per linear foot.
 - It takes about 15 minutes to prepare, install, and clean each foot of tile.
- a. How many brown tiles do you need for the border?
 - b. Write a bid for how much you will charge to supply and install the tile. Include what you want to charge as an hourly wage. Estimate what you think your profit will be.

Math Practice**Communicate Precisely**

What do you need to include to create an accurate bid? Explain.

**What Is Your Answer?**

4. **IN YOUR OWN WORDS** How can you find the perimeter of a composite figure? Use a semicircle, a triangle, and a parallelogram to draw a composite figure. Label the dimensions. Find the perimeter of the figure.

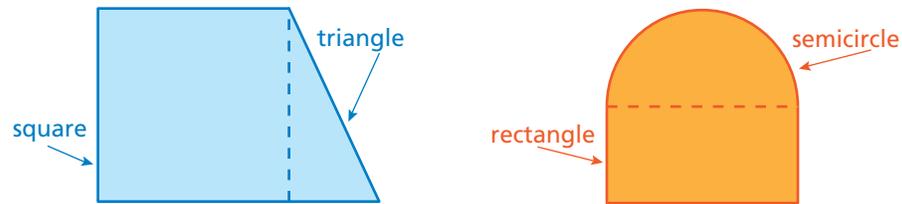

Practice

Use what you learned about perimeters of composite figures to complete Exercises 3–5 on page 328.

Key Vocabulary

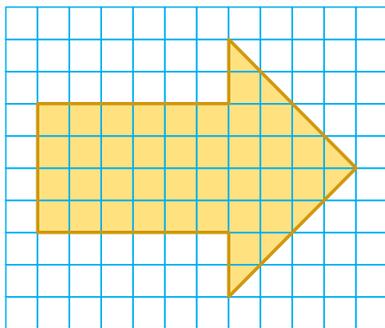

composite figure,
p. 326

A **composite figure** is made up of triangles, squares, rectangles, semicircles, and other two-dimensional figures. Here are two examples.

To find the perimeter of a composite figure, find the distance around the figure.

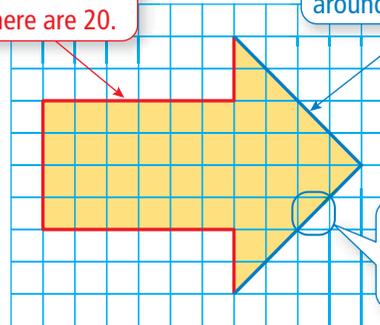

EXAMPLE 1 Estimating a Perimeter Using Grid Paper

Estimate the perimeter of the arrow.

Count the number of grid square lengths around the arrow. There are 20.

Count the number of diagonal lengths around the arrow. There are 8.

Estimate the diagonal length to be 1.5 units.

Length of 20 grid square lengths: $20 \times 1 = 20$ units

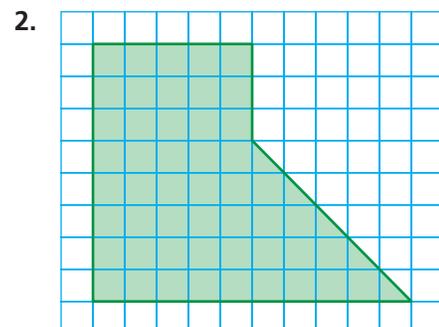

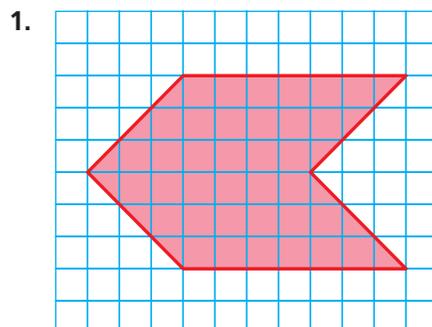

Length of 8 diagonal lengths: $8 \times 1.5 = 12$ units

So, the perimeter is about $20 + 12 = 32$ units.

On Your Own

Estimate the perimeter of the figure.

Now You're Ready
Exercises 3–8

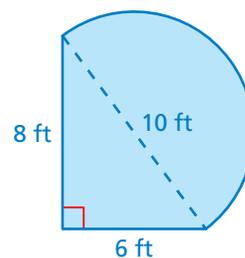

EXAMPLE 2 Finding a Perimeter

The figure is made up of a semicircle and a triangle. Find the perimeter.

The distance around the triangular part of the figure is $6 + 8 = 14$ feet.

The distance around the semicircle is one-half the circumference of a circle with a diameter of 10 feet.

$$\frac{C}{2} = \frac{\pi d}{2} \quad \text{Divide the circumference by 2.}$$

$$\approx \frac{3.14 \cdot 10}{2} \quad \text{Substitute 3.14 for } \pi \text{ and 10 for } d.$$

$$= 15.7 \quad \text{Simplify.}$$

So, the perimeter is about $14 + 15.7 = 29.7$ feet.

EXAMPLE 3 Finding a Perimeter

The running track is made up of a rectangle and two semicircles. Find the perimeter.

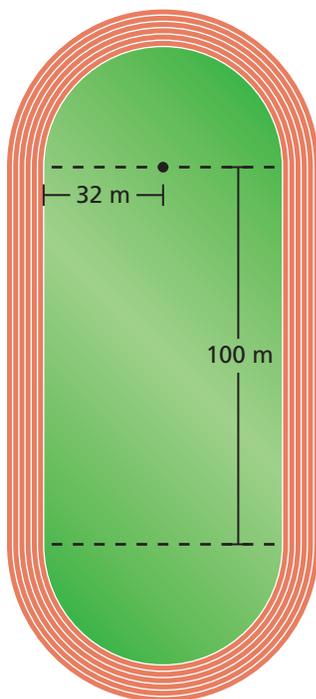

The semicircular ends of the track form a circle with a radius of 32 meters. Find its circumference.

$$C = 2\pi r \quad \text{Write formula for circumference.}$$

$$\approx 2 \cdot 3.14 \cdot 32 \quad \text{Substitute 3.14 for } \pi \text{ and 32 for } r.$$

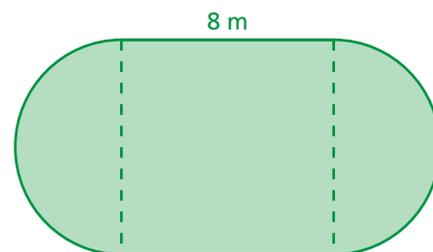

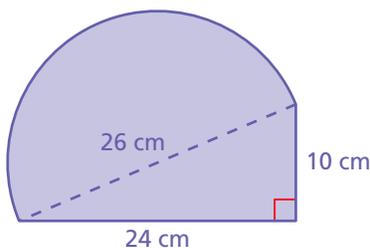

$$= 200.96 \quad \text{Multiply.}$$

So, the perimeter is about $100 + 100 + 200.96 = 400.96$ meters.

On Your Own

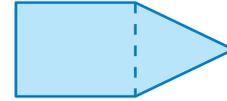

- The figure is made up of a semicircle and a triangle. Find the perimeter.
- The figure is made up of a square and two semicircles. Find the perimeter.

Now You're Ready
Exercises 9–11

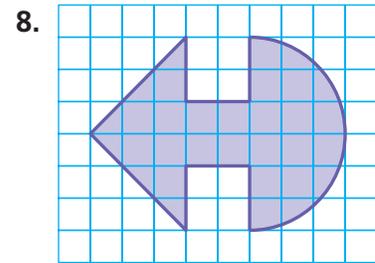

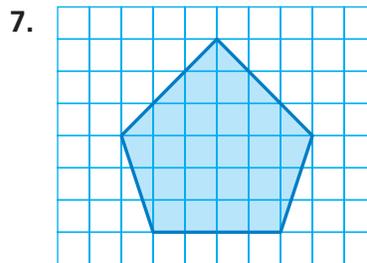

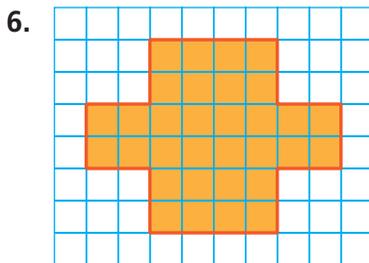

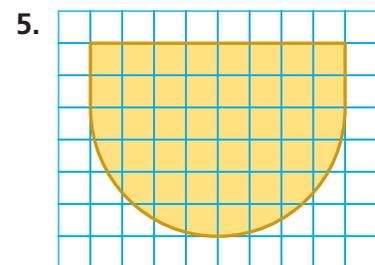

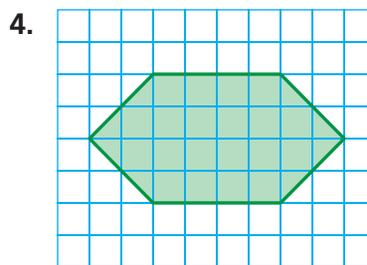

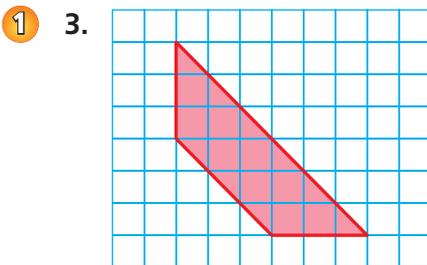

Vocabulary and Concept Check

- REASONING** Is the perimeter of the composite figure equal to the sum of the perimeters of the individual figures? Explain.
- OPEN-ENDED** Draw a composite figure formed by a parallelogram and a trapezoid.

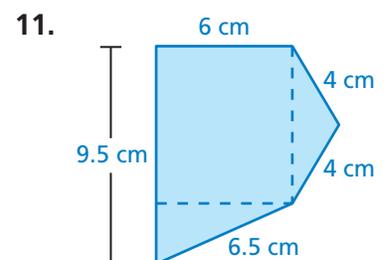

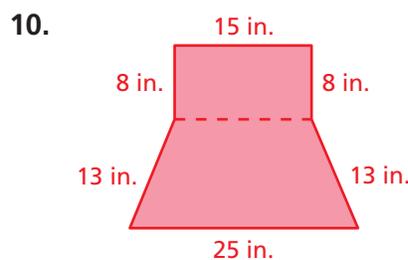

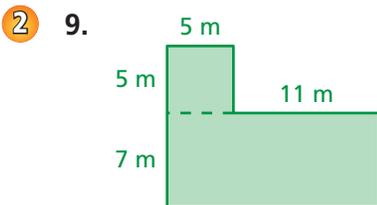

Practice and Problem Solving

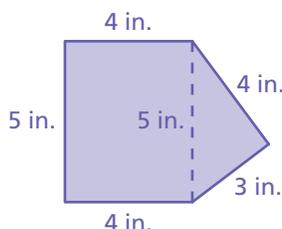

Estimate the perimeter of the figure.

Find the perimeter of the figure.

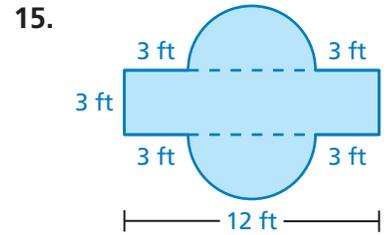

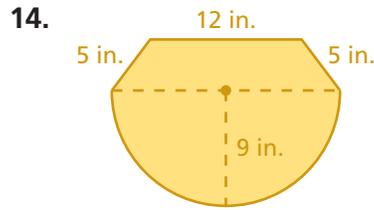

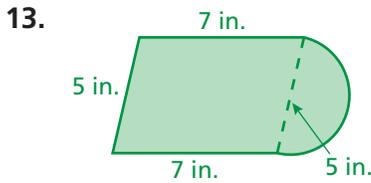

12. **ERROR ANALYSIS** Describe and correct the error in finding the perimeter of the figure.

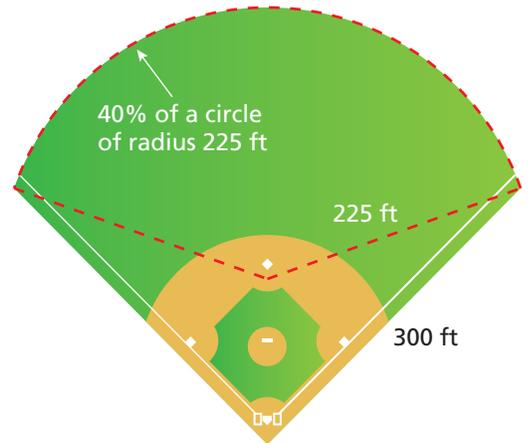

X Perimeter = $4 + 3 + 4 + 5 + 4 + 5$
= 25 in.

Find the perimeter of the figure.

16. **PASTURE** A farmer wants to fence a section of land for a horse pasture. Fencing costs \$27 per yard. How much will it cost to fence the pasture?

17. **BASEBALL** You run around the perimeter of the baseball field at a rate of 9 feet per second. How long does it take you to run around the baseball field?

18. **TRACK** In Example 3, the running track has six lanes. Explain why the starting points for the six runners are staggered. Draw a diagram as part of your explanation.
19. **Critical Thinking** How can you add a figure to a composite figure without increasing its perimeter? Draw a diagram to support your answer.

Fair Game Review What you learned in previous grades & lessons

Evaluate the expression. (*Skills Review Handbook*)

20. $2.15(3)^2$

21. $4.37(8)^2$

22. $3.14(7)^2$

23. $8.2(5)^2$

24. **MULTIPLE CHOICE** Which expression is equivalent to $(5y + 4) - 2(7 - 2y)$? (*Section 3.2*)

(A) $y - 10$

(B) $9y + 18$

(C) $3y - 10$

(D) $9y - 10$
